Physics A   PHYA5/2B

Unit 5B   Medical Physics
Section B

Tuesday 29 June 2010   1.30 pm to 3.15 pm

For this paper you must have:
- a calculator
- a ruler
- a Data and Formulae Booklet.

Time allowed
- The total time for both sections of this paper is 1 hour 45 minutes.
  You are advised to spend approximately 50 minutes on this section.

Instructions
- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information
- The marks for questions are shown in brackets.
- The maximum mark for this section is 35.
- You are expected to use a calculator where appropriate.
- A *Data and Formulae Booklet* is provided as a loose insert.
- You will be marked on your ability to:
  – use good English
  – organise information clearly
  – use specialist vocabulary where appropriate.

Section B

The maximum mark for this section is 35 marks. You are advised to spend approximately 50 minutes on this section.

1 (a) Complete the ray diagram to show the formation of the image of a real object by a diverging lens.

object

F   F
(2 marks)

1 (b) Define the power of a lens.

....

....

....

(1 mark)

1 (c) A lens of focal length – 0.56 m is used to correct a defect of vision of an eye.

1 (c) (i) Name this defect of vision.

....
(1 mark)

1 (c) (ii) The defective eye has an unaided near point at 0.15 m from the eye.
Calculate the aided near point distance, giving your answer to an appropriate number of significant figures.

answer = ... m
(3 marks)

1 (d) Another person was found to suffer from astigmatism. State the format of the prescription to correct this defect.

....

....
(1 mark)

8

2 (a) (i) Describe how the vibrations of a sound wave are received by the outer ear and transmitted to the inner ear.

....

....

....

....

....

....

....

....
(3 marks)

2 (a) (ii) Explain how the pressure changes due to the sound wave are amplified by the ear.

....

....

....

....

....

....
(2 marks)

2 (b) An intensity meter, set to the dB scale, measures the intensity level of a sound as 46 dB. Calculate the intensity of the sound at the meter, giving an appropriate unit.

answer = ...
(3 marks)

2 (c) The scale on the intensity meter is changed to the dBA scale and the new reading, for the same sound, is found to be 50 dBA. Explain this change.

....

....

....

....
(2 marks)

10

3 (a) On the axes below, sketch the action potential of a nerve cell. Indicate units and scales on both axes.

action
potential /

. . . .

time / . . . .

(3 marks)

3 (b) Explain in terms of ion movement, starting at resting potential, how bioelectrical signals are produced in muscle fibres.
The quality of your written answer will be assessed in this question.

....

....

....

....

....

....

....

....

....

....

(7 marks)

10

4 (a)   Outline the basic principles of a magnetic resonance (MR) scanner used to scan a patient's brain.

....

....

....

....

....

....

....

....
(3 marks)

4 (b)   State and explain **two** advantages of using an MR scanner to scan a patient's brain compared with a CT scanner.

....

....

....

....

....

....

....

....

....
(4 marks)
